Abstract

ipv7

Status of This Memo

This Internet-Draft is submitted in full conformance with the provisions of BCP 78 and BCP 79.

Internet-Drafts are working documents of the Internet Engineering Task Force (IETF). Note that other groups may also distribute working documents as Internet-Drafts. The list of current Internet-Drafts is at <https://datatracker.ietf.org/drafts/current/>.

Internet-Drafts are draft documents valid for a maximum of six months and may be updated, replaced, or obsoleted by other documents at any time. It is inappropriate to use Internet-Drafts as reference material or to cite them other than as "work in progress."

This Internet-Draft will expire on 21 April 2026.

Code Components extracted from this document must include Revised BSD License text as described in Section 4.e of the Trust Legal Provisions and are provided without warranty as described in the Revised BSD License.

## Table of Contents

|                           |   |
|---------------------------|---|
| 1. structure . . . . .    | 2 |
| 2. how it works . . . . . | 2 |
| 3. limits . . . . .       | 2 |

## 1. structure

ispname.ispprefix.customernumber.devicenumber

## 2. how it works

ispname is well the isp name, the ispprefix is the size of the address

## 3. limits

the limits are that you can only make the address 1mb, also you cannot hash it or compress it
