The RFCXML version 3 Vocabulary as Implemented
draft-rswg-xml2rfcv3-implemented-06

Abstract

This is a tombstone for a document that described the RFCXML version 3 vocabulary as it was previously implemented in tools used by the RFC Production Center. There is no intention of publishing this Internet Draft as an RFC. See the introduction for more information about this tombstone.

Status of This Memo

This Internet-Draft is submitted in full conformance with the provisions of BCP 78 and BCP 79.

Internet-Drafts are working documents of the Internet Engineering Task Force (IETF). Note that other groups may also distribute working documents as Internet-Drafts. The list of current Internet-Drafts is at <https://datatracker.ietf.org/drafts/current/>.

Internet-Drafts are draft documents valid for a maximum of six months and may be updated, replaced, or obsoleted by other documents at any time. It is inappropriate to use Internet-Drafts as reference material or to cite them other than as "work in progress."

This Internet-Draft will expire on 25 June 2026.

1. Introduction

Previous versions of this draft discussed the updated version 3 ("v3") of the RFCXML vocabulary as they were implemented in tools used by the RFC Production Center (RPC). However, the information in this draft has been superseded by <https://authors.ietf.org/en/rfcxml-vocabulary>, which is maintained by the RPC. That site is now the definitive version of the RFCXML vocabulary. More information can be found at <https://authors.ietf.org/en/rfcxml-overview>.
